Tetiana KOZHUSHKO

UI/UX & Product Designer

B2B SaaS · Web · Mobile

Hi, I'm Tetiana. I design products people understand without a tutorial, along with the flows, prototypes and components behind them. At GRC Trail I was **the only designer**, so every screen of a compliance platform passed through my hands. I also teach dance, so I **designed and built a booking app for my own classes**. It's live, and I keep shipping updates.

open to work:
full-time or freelance

NOW	GOOD AT	BEFORE DESIGN	BASED IN
Junior+ UI/UX Designer at ACW Soft Solutions	**B2B SaaS, web apps, design systems**	**Marketing, PR and a lot of retouching**	**Warsaw, remote works too. PL C1, EN B2**

things i've *made*

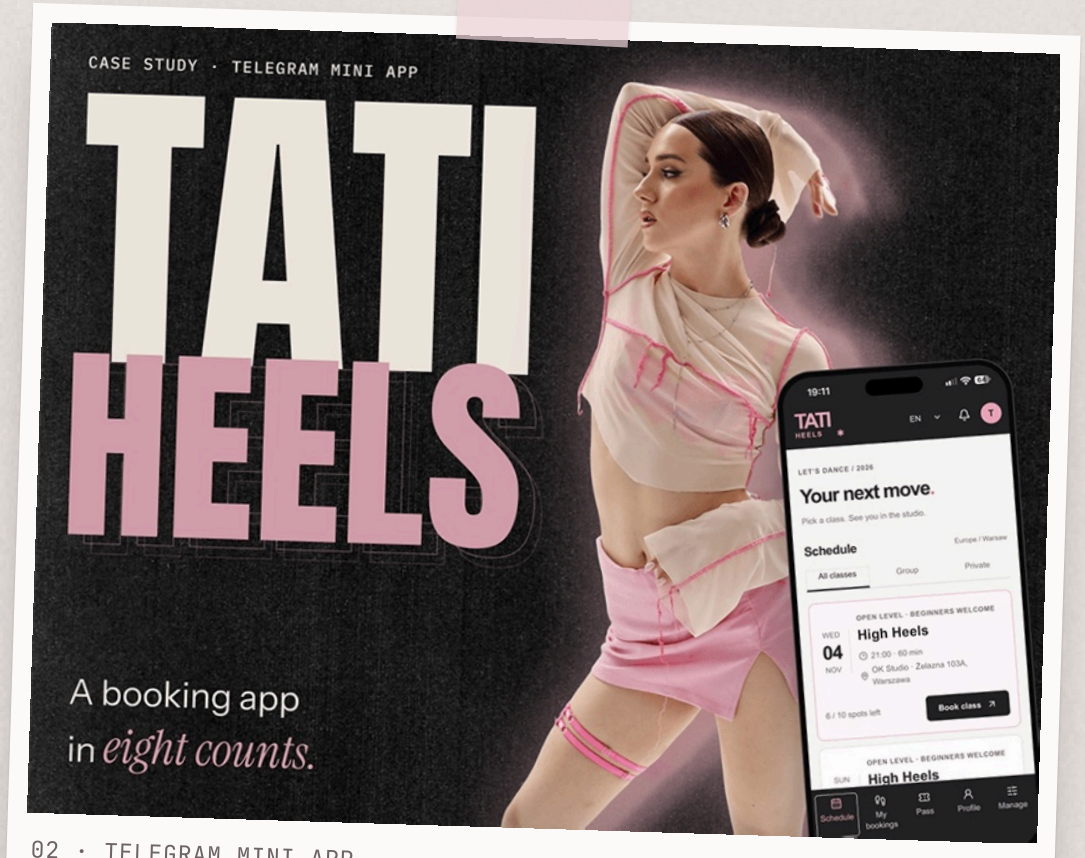

01 · B2B SAAS 2025

GRC Trail

Software that walks a company through GDPR, SOC 2 and ISO 27001. I was the only designer on the team, so the structure, flows, prototypes and component library were mine. Risks, evidence, vendors, audits: I drew all of it.

Only designer · IA · Design system · Dev handoff · Open case ↗

02 · TELEGRAM MINI APP LIVE

Tati Heels

I teach High Heels classes in Warsaw, so I made the booking app for my own students. I designed it, then built it myself with AI-assisted coding. Students pick a class, pay and check their pass without leaving Telegram.

Design + build · Mobile · Live · Open case ↗

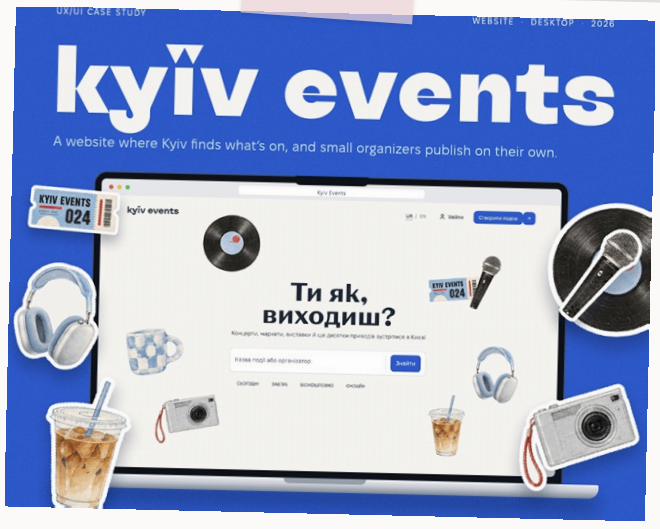

03 · CLIENT PROJECT WEB

What About Tours

A real client and a team project. My part was everything a traveler sees after pressing "Book": bookings, the tour day, the awkward edge cases and reviews. Desktop and mobile.

Open case ↗

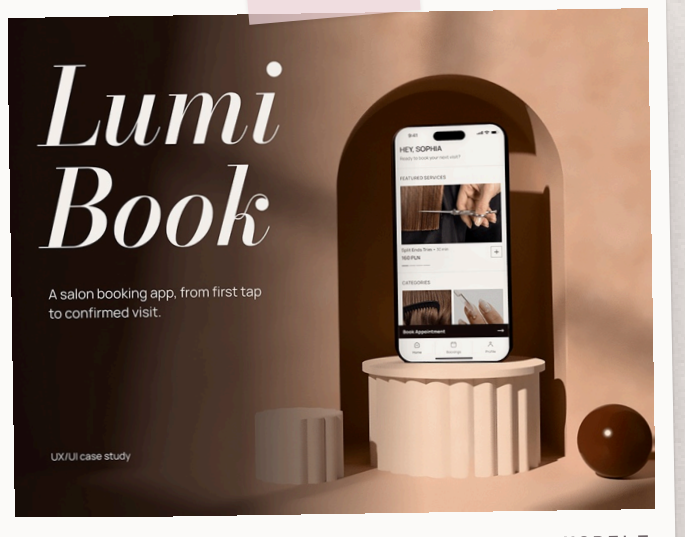

04 · WEBSITE DESKTOP

Kyiv Events

A site for finding something to do in Kyiv tonight. Small organizers post their own events without asking anyone, and one design system serves both sides.

Open case ↗

05 · IOS APP MOBILE

LumiBook

Booking a salon visit in a few taps. I kept the interface quiet and warm, so the photos and prices do the selling.

version *history*

I came to design from marketing. Retouching taught me to see every pixel, the agency taught me deadlines, and a startup taught me what it means to own a whole product.

5 versions since 2023

V5 · CURRENT VERSION MAR 2026 – NOW

Junior+ UI/UX Designer · ACW Soft Solutions

- I design web and mobile apps for the clients of a software house, from the first flow to the final spec.
- I keep the component libraries tidy with Auto Layout, so the team reuses parts instead of redrawing them.
- I run usability tests and fix the navigation and copy that confuse people.
- At handoff I sit with developers and answer all the "what happens if..." questions.
- I prototype with AI tools to try ideas before I commit to one.

↑ PROMOTED FROM JUNIOR AFTER 5 MONTHS

V4 OCT 2025 – FEB 2026

Junior UI/UX Designer · ACW Soft Solutions

- Wireframes, layouts and clickable prototypes for product and website projects.
- Responsive screens and reusable components, polished after team reviews and ready for developers.

V3 APR – SEP 2025

Product Designer · GRC Trail

- The only designer at a startup making compliance software for GDPR, SOC 2 and ISO 27001.
- I owned the information architecture and drew every module: dashboards, policies, evidence, risks, vendors, privacy and audit prep.
- Compliance is a dense topic. Most of my time went into making long, tangled workflows feel like one calm product.

V2 AUG 2024 – MAR 2025

UI/UX Designer · Move Agency

- Website layouts and interface elements for agency clients.
- Social media visuals and covers, with short deadlines and many rounds of feedback.

V1 · INITIAL COMMIT JAN 2023 – JUL 2024

Marketing & PR Manager · Sister's Aroma

- Marketing, content and visuals for a product brand. Hours of photo retouching in Photoshop, which is where my eye for detail comes from.

my *components*

❖ Research & structure

- Interviews and usability tests
- Information architecture
- User flows, unhappy paths included
- Product analytics

❖ Interface

- Wireframes and clickable prototypes
- Responsive web and mobile UI
- Design systems on Auto Layout
- Type and visual hierarchy

❖ Delivery

- Specs and states devs can build from
- Working side by side with developers
- Prototyping with AI tools
- Shipping my own code with AI help

full-time or *freelance*

Variant · Full-time

in your team

I'm looking for a Junior or Associate Product Designer or UI/UX Designer role. A product team or a design and dev studio, both suit me.

- → Warsaw office or remote
- → International team: English B2, Polish C1
- → B2B SaaS, web apps, internal tools

Variant · Freelance

on your project

Send me the brief, even a messy one. I'll come back with structure, flows, UI and a Figma file your developers can build from.

- → Websites and landing pages
- → Web apps and dashboards
- → Mobile UI and Telegram Mini Apps
- → Design systems in Figma
